\$2.00 A YEAR IN ADVANCE

Ratepayers Nominate Four Candidates in Div. 2 and 5

The annual meeting of the Municipal District of Carbon was held in the Masonic hall, Carbon, on Saturday afternoon at 1 o'clock, and a large number of the ratepayers were present, many items of interest to the Municipal ratepayers being discussed.

L. B. Hart was elected chairman of the meeting.

At this meeting D. G. Code addressed the audience on the School Fair Association.

It was decided, after considerable discussion, that ratepayers be given preference to perform and road work undertaken in the Municipal District during their 1931 Municipal Tax levy, and that no road boss be paid more than \$5 per day, including use of car.

It was decided at this meeting that the council be requested to spend only the minimum amount required to maintain roads this year and further that the Government Grant, Capital Grant and Income Grant should not be accepted, if it is found necessary to borrow money for purpose of constructing roads on a fifty-fifty basis by accepting Government Grant.

The following nominations were received for Municipal Councillors:

To Hospital Board, G. H. Webber, elected by acclamation.

Division 6—G. H. Webber elected councillor by acclamation.

Division 5—H. H. Crowell of Nacmire; R. S. Near of Ghost Pine.

Division 2—Gottlieb Ohlhauser; Edward Schell.

In Divisions 5 and 2 the elections will be held on Saturday, February 28th, during the hours of 9 to 5.

A GOOD CODE

I will speak no mean, untruthful, or profane word.

I will keep my promises and pay debts promptly.

I will play the game squarely and be a good sport whether I lose or win.

I will give full service to Society for the money that I get.

I will whistle and smile when days are dark.

I will fall asleep every night looking at myself acting and looking as I want myself to act and look.

I will take as my motto:

"My own happiness does not greatly matter; but I must make others happy."

500 DUCKS WINTER AT SYLVAN LAKE THIS YEAR

For the first time in a dozen years, ducks have made a success of staying most of the winter in the Central Alberta district. A flock of some five hundred birds are living at Sylvan Lake, some 15 miles northwest of Red Deer.

The birds are mostly mallards and have bunched together to keep a small portion of the lake open. They fly to the stubble fields of the neighborhood for feed, but a bird recently shot by a farmer showed that the birds face starvation. The game authorities were notified and Ben Lawton, Provincial game warden, made a visit to the lake recently to see about arranging to feed the flock.

LITTLE NEWS ITEMS FROM THE SOUTH

Mr. and Mrs. Schultz and family moved to High River last week. They have bought a farm there.

Mr. Ed Tucker will leave the George Marshman place in a short time. He has been farming this place for the last ten years and we understand that he now is going over to Morley, Alta.

Mr. E. Sailer had the misfortune to upset his truck last week with a load of gravel. The spindle broke on one of the front wheels, causing the accident. He got off lucky, however, without getting hurt.

Mr. Adam Bertsch was attending the A. P. elevator at Carbon last week, while Mr. McGregor was away in Calgary.

The Young Peoples Society of the First German Baptist Church held a program on Sunday night, Feb. 22nd. The new orchestra played for the first time and the music was real good.

Mr. John Brost and the Metzger brothers are busy digging coal this week.

FOR SALE—A-1 Milk Cow. Due to freshen in about two weeks.—Apply to Jas. Smith, Carbon.

SCHOOL FAIR WHIST DRIVE AND DANCE

The Carbon School Fair executive held a jolly whist drive and dance in the Masonic Hall of Friday night of last week and a fair crowd was present on the occasion. Both whist and bridge were played at the tables, the following being the prize winners:

Bridge: Ladies, Mrs. L. Poxon, Gentlemen, T. J. Ramsay.

Whist: Ladies, Mrs. LeMay; Gentlemen, Jack Code.

NASH'S STORE BROKEN INTO SUNDAY MORNING

C. H. Nash's grocery store was broken into Saturday night or early Sunday morning and at present the culprit or culprits have not been caught. Entrance was gained through the back way and about \$40 in cash was taken besides a large quantity of groceries.

Constable Jones of the Alberta Provincial police is conducting an investigation.

SHALL HOMEWORK BE ABOLISHED IN SCHOOLS

(From report on annual school week)

There is the idea that the home should be in constant touch with what the pupils are doing at school. If there is no homework how can this be accomplished? It seems to the writer that it is the most natural thing in the world for children to be doing over again at home, the things they did at school during the day.

Again we memorize or learn by the frequency with which we perform an act. If there is no repetition at home, the mind is allowed to lapse and the time of the teacher must be taken the following day to re-teach what a great many of the pupils will have forgotten whereas a little time spent at home reviewing what was taken up during the day would fix it in the children's minds and they would be ready to proceed the next day without any unnecessary delay.

There is no ruling of the Department of Education in this province forbidding homework as some individuals imagine. It is true that a notice to that effect was sent out about fifteen or sixteen years ago viz. "that any teacher giving homework to pupils under Grade VI would be liable to have her certificate cancelled." The writer of this article was a member of a deputation who waited upon the then Minister of Education and this matter was one of the subjects discussed with him. He expressed great surprise that such a statement had been sent out by the office of the Deputy Minister, and said that he knew nothing of it, that he did not sanction it, that he did not agree to it and that no teacher need of having her certificate cancelled because she gave her pupils homework, and that he considered homework more or less optional in order to keep the homes in touch with what was going on in the class room. Moreover the departmental official, who was responsible for the notice that was sent out from the office of the Deputy Minister, told the writer that his whole personal attitude toward homework had changed and that he now thinks that it is the most natural thing in the world for normal pupils not only to have homework but to want to have exercises to do at home.

Then there is the group of people who grow up with anti-teacher complexes, who regard the teacher as the enemy of the child, and the source of all the evil that befalls the neighborhood and one who must be opposed in any and every way imaginable. This of course is obviously the wrong attitude to take. The teacher is the one individual who should receive unbiased support and encouragement from the parents, for has she not the control of the children during the greater part of their waking hours and should there not be close co-operation between the school and home for the best welfare of the children? The school is the first point of contact that the child has with the great outside world, and the parent who openly criticises the teacher for any reason whatever in the hearing of the pupils is a sinner above all men and certainly has not got the interests of his own children at heart.

Carbon Exploration Co. Rejects Murphy Offer

CREAMERY SHORT COURSE STARTS MARCH 2

A two weeks' creamery course is now being offered jointly by the University of Alberta and the provincial department of agriculture, to commence Monday morning, March 2nd, according to Dr. C. P. Marscr, provincial dairy commissioner. The course will be held in the department of dairying at the university. This offer is intended primarily for persons with some practical experience in creamery work. There will be no tuition fee.

Lectures and reviews will be given each day during the course, and will deal with some aspects of the development and organization of the dairy industry; principles and methods in the production and handling of milk and cream; the testing, grading and quality basis marketing of milk, cream and butter; and the care and handling of the apparatus and equipment used in dairy and creamery operations; also, some chemistry and bacteriology involved in common dairy practice.

The practical work in the laboratories will include the testing, grading and pasteurization of cream; buttermaking with special emphasis on composition control; grading and testing of butter and the handling of centrifugal separators and other equipment. There will also be laboratory demonstrations illustrating chemical and bacteriological principles as applied to dairying.

It is the purpose of the short course to stress the importance of a close study and check of the various operations that occur in the course of the creamery workers daily activities. The program will be so arranged that and creamery workers who are not in a position to take the full course, may plan a shorter stay and still participate in the lines of work that interest them most.

A meeting of the directors and members of the Carbon Exploration Company was held in the Municipal office on Monday evening, February 23rd, for the purpose of making a deal with Mr. W. A. Murphy of Calgary for the drilling of a well on the Company's leases. Mr. Murphy seemed interested enough in the oil and gas possibilities, but his proposition for drilling, as outlined by him at the meeting, was unanimously rejected. This proposition, we understand, was for a five per cent royalty on at least ten thousand acres and the directors and members did not think that the royalty was sufficient for the acreage involved.

Other deals are pending and it is expected that the Directors of the Company will have a definite proposition within the next few weeks.

The Carbon Exploration Company is a holding company of Calgary and Carbon interests and this concern now holds approximately 19,000 acres of oil and gas leases adjacent to the Village of Carbon. Last summer a test gas well was drilled on the property to a depth of 655 feet and a large gas flow was struck. When this was lighted the reddish flame rose about forty feet in the air and when this amount of gas was obtained the directors of the Company stopped drilling operations, their purpose having been accomplished.

It is understood that the Company, although it has several deals pending, is still open for any reasonable proposition from a reliable concern to put down a test well on a fair royalty basis for considerable acreage, if necessary.

A Story of Fifty Years

"Montreal, February 16—Fifty years ago today incorporation of the Canadian Pacific Railway took place. George Stephen, afterwards Lord Mount Stephen, was the company's first president. The company deposited with the Dominion Government, at Ottawa, a cheque for \$1,000,000 as a guarantee that it would fulfill its contract to complete the railway to the Pacific Coast. This pledge was completed in five years instead of the ten the contract called for."

This brief but significant news despatch appeared in the daily newspapers of Canada on February 16 last. It recalls an historic incident, a milestone in the history not only of Canada but of the world. It not only carries the mind back, but, because of all that backward glance discloses, it inevitably forces the mind forward to a contemplation of what the next fifty years may unfold. It impresses one with the tremendous developments and possibilities of a span of only fifty years.

Fifty years ago the project of a transcontinental railway across Canada was viewed with scepticism by thousands in Canada, and was regarded as the maddest kind of a venture in Great Britain. Men prominent in public affairs declared it would never earn its axle grease. The country it was to traverse was described as a wilderness, partly desert, incapable of successful cultivation and settlement by white men, followed by miles of snow capped mountain peaks and ranges.

That success rather than failure followed the great undertaking can be credited to a few stout-hearted, far-seeing men who were veritable giants in energy, resource, and grim, unbeatable determination. In some respects they were ruthless; their methods were not always above suspicion, but they had a vision and a driving force to achieve their goal regardless of any and all obstacles. Individually they staked their all on the success of the enterprise, obliterated the word "failure" from their lexicon, and won. Canada, the world, knows the result.

The railway made a new nation. It opened up an empire. It altered the trade routes of the world. It brought the Orient to the Occident, and the Occident to the Orient. The enterprise initiated fifty years ago by a new-born Dominion of a few millions of people, has amazed the world. It has become the greatest transportation system in the world, with its fixed bands of steel not only crossing and criss-crossing Canada, and extending well into the United States, but with its vessels navigating the seven seas, calling at the ports of all nations, and circumnavigating the globe.

The Canadian Pacific Railway has helped to make Canada what it is. It has made and unmade Canadian Governments. The history of the Canadian Pacific is in part the history of modern Canada. The success of the railway has been bound up in the development, the prosperity, the success of this Dominion. The management of the railway has always recognized that fact, and it has been pro-Canadian at all times and in all its policies. It has made mistakes, of course; it has been selfish, even dictatorial at times, but it has always been magnificent.

The Canadian Pacific has been created and developed under the presidency of four men, Sir George Stephen (later, Lord Mount Stephen), Sir William Van Horne, Sir Thomas (later Lord) Shaughnessy, and Mr. Edward W. Beatty. The history of the railway may likewise be divided into four periods, or possibly three as the first two merge into one. First the period of organization of the company, early financing, and actual construction under Stephen and Van Horne; second, the period of well organized, highly efficient operation under Shaughnessy, with well defined policies of branch line construction as feeders, opening new territory, and the establishment of mercantile fleets and overseas services; third, and coupled with a vigorous continuation of the Shaughnessy policies, what may be termed, in the absence of a better word, the diplomatic period under Beatty wherein up-to-date railroading has been strengthened by securing the goodwill, the admiration, the co-operation of the public generally, and the elimination of those feelings of suspicion and antagonism which undoubtedly marked the relations of the people and the railway in the earlier days.

And in the story of these fifty years is there not a lesson and an inspiration for the people of Canada? The railway had its periods of difficulty and depression, just as individuals and nations experience them, but it surmounted them. The makers of the Canadian Pacific did not shorten their vision to a year or two, or five or ten years; they looked into the future and planned and built with courage and confidence. They have had their reward. So, too, should the Canadian people maintain the forward look, act with courage and decision, remain confident. Canada has done great things in the past; it can do greater things in the years to come.

Honored By Italy

F. C. Elford Appointed Member Of Executive For Fifth World's Poultry Congress

F. C. Elford, Dominion Poultry Husbandman and Past President of the World's Poultry Science Association,

under whose auspices the World's Poultry Congresses are held, has been signally honored by the government of Italy, who appointed him a member of the executive for the Fifth World's Poultry Congress which meets in Rome in 1933. Mr. Elford has also been asked to take charge of organization of the Canadian delegation to Rome. From present indications the next Congress will fully equal the success of last year at London, England.

Telephones In Canada

The estimated number of conversations by telephone in Canada during 1929 was 2,525,500,000, including 37,851,000 long distance calls. For every 100 of the population in that year there was an average of 15 telephones.

A Scientific Mystery

Source Of Cosmic Rays Has Not Been Discovered

Discovery of cosmic rays in sunshine—the same rays that penetrate about 700 feet into earth—is described in advices received at New York from Vienna.

The communication is from Prof. E. Spath, president of the Chemical and Physical Society, and is sent to clear a misunderstanding about the report made recently to the society of Prof. Victor F. Hess, of the University of Graz.

Vienna despatches had it that Professor Hess announced the discovery of cosmic rays and that his talk created a sensation among scientists.

But Prof. Spath points out that Dr. Hess did not claim to have discovered cosmic rays, which were found 18 years ago, but that he had evidence that a small percentage of these rays come from the sun.

Their origin has been one of the great scientific mysteries. The fact that most electroscopes used to detect them showed as many at night as in the day was held by some scientists to eliminate the sun as a source.

BREAKS UP GAS IN THE STOMACH

Don't suffer from dangerous gas pressing around your heart, from sourness, acidity, bloating or pain of indigestion. Stop worrying. Whenever you need quick stomach relief, take a little Blasted Magnesia—powder or tablets. It breaks up gas, neutralizes acids and keeps the stomach sweet and strong, and indigestion perfect. At all good drug stores.

Cancer Research

Ontario To Supply Free Treatment To Sufferers

Within the next two months, possibly before the present legislature prorogues, the Ontario cabinet will make public the nature of the investigation into the cancer question to which it has committed itself. The cancer treatment, whatever it may be and whenever adopted, will be supplied free to sufferers, Premier George S. Henry stated.

Ontario led the way in the distribution of free insulin for diabetes treatment. It followed this with the manufacture of a free serum for combatting infantile paralysis, and several other treatments for diseases are also available to the general public at cost. Now the government will make available, free, the cancer treatment that will eventually be adopted.

Should the government decide on investigation by commission, it will have, it is believed, the assistance of the Ontario Research foundation. At the present time the foundation is understood to be making further investigation into the value of radium ore from Haliburton township.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

It may be mixing metaphors, but the man who puts his shoulder to the wheel seldom has to put his nose to the grindstone.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

More than 21,000 cafes serving foreign foods have been opened in Japan.

To Test Hudson Bay Route

Would Increase Initial Grain Movement To Not Less Than 5,000,000 Bushels

Asking that Federal Government through Hon. Dr. R. J. Manion, Minister of Railways and Canals, give due consideration to the advisability of increasing the initial grain movement to not less than 5,000,000 bushels in order to adequately demonstrate the Hudson Bay route as a "valuable and necessary trade outlet for export farm products," the Saskatchewan traffic council unanimously passed a resolution to that effect.

For Catarrh.—It is one of the chief recommendations of Dr. Thomas' Eclectric Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

The man with a private grievance usually becomes a public nuisance.

Four-fifths of the automobiles owned in Brazil were bought on time.

Soviet Plan a Failure

Engineer Says Five-Year Idea Has Entirely Collapsed

Philip Harty and Mrs. Harty, of Newark, N.J., stepped down the gang-plank of the liner New York and heaved hearty sighs of relief. They were back where shoes cost less than \$60 a pair, and butter not quite \$6 a pound. They had come back from Russia.

Harty, mechanical engineer, who went to Russia last August to investigate rolling mills in Siberia, had much to say, and little of it was complimentary to the Soviet or the so-called five-year plan of social and industrial rehabilitation.

"The five-year plan is not collapsing," Harty remarked. "It has collapsed. The people are in rags. There is depression everywhere."

The Family Doctor

The family doctor is coming back, says a physician who has been making a national survey of the medical situation. He has been ignored lately in favor of specialists on one hand and self-doctoring on the other. — Brockton, Mass., Times.

Smothering and Fainting Spells Everything Would Turn Black

Mrs. Andrew Black, Harcourt, N.B., writes: "I had been troubled with smothering and fainting spells and everything in front of me would turn black, and I would fall down in a faint and be unconscious for several minutes. I did not know what to do, until one day I was reading where Milburn's Heart and Nerve Pills had helped so many people and decided I would give them a trial. I used four boxes and found they help me wonderfully."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Valuable Information Secured As To Habits and Movements Of Migratory Birds In West

The value of a more intimate knowledge of the habits and movements of the migratory birds of this continent in the advancement of conservation and protection is widely realized. In Canada, the United States, and Mexico wild life conservationists are co-operating in a study of the lines of migrational flight of the different species as they pass northward to Canada for the annual breeding season and again southward to the winter feeding grounds. Of all the birds protected under the term of the Migratory Birds Convention between Canada and the United States, ducks and geese are probably the best known. Both sportsmen and wild life lovers are intensely interested in the propagation of these species, the former for the sport they provide and the latter for the opportunities for observation and photography.

The waterfowl supply is not only of interest to Canada, but also to our neighbors in the United States and Mexico. It is estimated that between seventy-five and eighty per cent. of the ducks and geese of North America are raised north of the Canada-United States boundary. A very large share of the continent's duck supply is hatched in Manitoba, Saskatchewan, and Alberta. During the last few decades great changes have taken place in the southern parts of these provinces where the most important of the duck nesting grounds are found. Settlement and agricultural development have curtailed the breeding areas, and when dry conditions prevail, shrinking the shallow lakes and marshes, the effect on the duck supply of the continent is marked.

The opinion has been frequently expressed that if the ducks were driven from their prairie breeding ground by the necessary invasion of agriculture they would just retreat to some northern fastness to breed. A study of the known breeding ranges of most of the species of ducks of Canada which are of interest to the sportsman, shows that most of northern Canada is outside of the breeding range for these species, and it would be exceedingly unlikely for prairie nesting species to nest elsewhere. That large part of Canada which is covered by the pre-Cambrian shield is not essentially a duck breeding area. However, investigations are under way to find exactly how important this vast section of Canada may be in the production of ducks and whether its usefulness in this connection can be improved.

The geese are more essentially northern breeders than the ducks and that may be why races of Canada geese as well as other species of geese have maintained their numbers so well, even in the face of very persistent pursuit and hunting in the more southern parts of the continent.

In an effort to add to the store of knowledge concerning ducks and other waterfowl throughout Canada, the Department of the Interior has enlisted the voluntary co-operation of several hundred waterfowl observers. Each of these observers reports upon the status of waterfowl in his area during four periods of the year and tells in general terms whether ducks or geese were plentiful, fairly common or scarce. He is further invited to comment on changes which have occurred in the abundance of waterfowl over periods of years and to state the cause for any change if possible.

By this census system, very valuable statistics have been gathered and the work still continues. It has been used to substitute definite knowledge for guesswork in the recording of waterfowl conditions in the various parts of Canada. There is room for additional observers, especially in some parts which are not well covered at present, and any person who is interested in birds, and feels that he can add materially to the knowledge of the Department respecting waterfowl conditions is invited to communicate with the Commissioner of National Parks, Department of the Interior, Ottawa, Canada.

A Recent Discovery

Vitamin "D" Can Now Be Put Into Bread

Charging ordinary bread with vitamin "D," a vital food element which prevents rickets, and builds up bone and general health, is now possible following a discovery made by research workers in the Toronto hospital for sick children. Announcement of the discovery was made recently.

A few months ago workers in the same laboratory found a way to impregnate biscuits and these have been on the market for some time.

The Horse In Town

Although Used To Automobiles They Are Still Bewildering

They tell us that the city is no longer a fit place for a horse. He does not now, as he did 20 years ago, stand on his hind legs, snort and paw the air at sight of an automobile, nevertheless these contraptions that go along with no visible supply of legs keep him in a constant state of bewilderment, apprehension and brain fog. He feels precisely as a woman does who has no card-sense and yet tries to learn contract bridge. It is all beyond him. All he can do is to stagger on and suffer. So you would think that the effort to keep horses in the cities would be abandoned. But it seems that there are occupations in which the horse manages even now to hold his own against his rival, the gas engine. The milkman, the iceman, the huckster, the junkman, all of whom make house-to-house stops, find the horse-drawn vehicle convenient and economical.

A milkman's horse, once he has learned his route and knows his master's voice, moves on or stops at a word, or a whistle from the curb, while the reins lie slack over the dashboard of the wagon. The automobile has yet to be invented that will beat a horse at that.

Canadian Made Boots

According to the latest official figures the total production of leather footwear in Canada for the eleven months ended November 30 last year, was 16,023,190 pairs, or an average per month of 1,456,654 pairs.

Dairying and Mixed Farming In Western Canada Assisted By Tree Planting Movement

During the planting season of 1930 there were sent out from the forest tree nurseries of the Forest Service of the Department of the Interior and planted on farms in the Prairie Provinces more than 6,000,000 little trees—seedlings and cuttings—bringing the grand total of trees so supplied and planted since this work was begun by the Department in 1901 to over 116,000,000. Figures so large as this require to be analyzed before their significance can be realized. To enable them to be more easily visualized it may be stated that this planting stock has been sent out to over 100,000 applicants and a careful review of the returns of the Forest Service inspectors shows that in spite of all opposing causes—fire, flood, insects, and neglect—80 per cent. of all the plantations set out on the Canadian prairies under this plan in the last thirty years are now flourishing and vigorous. These thriving plantations cover 32,000 acres or 50 square miles. The area covered might be pictured as a strip of forest a mile wide stretching from the western limits of Winnipeg to the eastern outskirts of Portage la Prairie. Such a strip would be small in the vastness of the prairies, but a comparison like this would not be fair because the plantations are strategically placed for the purpose intended in the very best positions. A comparison of the total area covered with the total number of plantings shows that the average plantation is 1,936 square yards or nearly half an acre in extent.

There is another point that must not be forgotten. The plantations recorded are only those for which the planting material was sent out from the Forest Nursery Stations at Indian Head or Sutherland, but once a plantation is established it becomes a source whence seeds and cuttings are drawn to start plantings on other farms in the neighborhood. Thus it has been found that the work goes on with increased pace with each new windbreak set out. The mainspring of the tree-planting movement is to increase the production of the homestead and the comfort of the dwellers in the farm home. That production of grain crops is increased has been amply proved and the windbreaks about the farm home and barnyard add to the comfort of the family and to the protection of the live stock.

Of late years there has been a marked tendency toward the diversification of the products of prairie farms. Dairying, the raising of poultry, and beekeeping have made important gains and these and other new lines of activity have been assisted by the tree-planting movement. The establishing of gardens—a direct result of the introduction of shelter-belts—with the consequent producing of tender vegetables and bush and tree fruits, has resulted not so much in adding to the variety of commodities the farmer has to sell as in increasing the number of things he has for his own use. The strawberries, raspberries, tomatoes, melons, plums, and apples now grown by many prairie farmers in their tree-sheltered gardens, are not largely sold, but they improve the dietary and increase the health and pleasure of the farm dwellers. An analysis of the reports of the inspectors showed that on the 7,600 farms visited during the year, 6,800 had well kept gardens, 2,700 had plots of small fruits, and 400 carried orchards containing fruit-bearing trees. A prairie by-word in years gone by was, "Grow another five acres of wheat and buy your vegetables and fruit," but the returns of recent years show that the farmers are realizing that it pays better to grow these things in the farm garden.

All the benefits of prairie tree planting set out above are material and have a cash value. There is the other side—that of sentiment—which, though it cannot be reduced to dollars and cents, is very powerful. The automobile is now a very common means of travel and if anyone who thinks that sentiment does not count with our farmers will keep his eyes open on a motor trip through any part of Canada he will soon see by

the dignified and appropriate names which our farmers give their holdings that they regard their places not as factories but as homes. And the two subjects with which the names most frequently deal are trees and views—Maple Lodge, Cedar Grove, Elm-vale, Oak Knoll, Forest View, Fairview, Shady Lawn, Poplar Point. Everyone will recognize these as typical farm appellations and the recurrence of these and similar names can only mean that the farmer is greatly affected by his surroundings, and that his contentment in particular is increased by having trees about his home. These benefits, material and of sentiment, are doubtless the causes why for thirty years, in good season and bad season, the tree-planting movement has continually spread. Applications to receive trees for planting in 1932 are now being received by the Superintendent, Forest Nursery Station of the Department of the Interior at Indian Head, Saskatchewan, and those interested will receive full information as to the plan on application.

Estonia Enters Exhibit

Will Take Part In World Grain Show and Conference

Official announcement has been made from the headquarters office of the World's Grain Exhibition and Conference, Regina, of the official acceptance of the invitation to participate in this world-wide event of 1932 by the minister of agriculture of Estonia on behalf of the government of that country.

Mihkel Pill, chief of the plant-breeding station at Jogeve, Estonia, has been appointed by the minister of agriculture as the representative of Estonia in charge of the exhibit which that country will prepare for the exhibition and conference.

The Estonia Republic is situated on the eastern shore of the Baltic Sea, south of the Gulf of Finland. The total area of the country is about 18,350 square miles and the population was recently stated to be 1,136,553 people.

With the acceptance of Estonia of the invitation to take part in the 1932 Grain Exhibition and Conference at Regina, 14 countries have now definitely stated their intention to take part, namely: Italy, Peru, Yugoslavia, Guatemala, New Zealand, Czechoslovakia, the Netherlands, Belgium, Poland, Siam, India, Portugal, Switzerland and Estonia.

Advance In Grain Shipments

Shipments From Vancouver Nearly Double That Of Last Year

Shipments of grain from the port of Vancouver during the present crop year, which began on August 1, 1930, are nearly double those for the corresponding period in the 1929-30 crop year. From August 1 to January 15, 1931, total shipments amounted to 35,139,551 bushels, an increase of 16,150,864 bushels over the first five and a half months in the previous year. Of the total shipments of grain in the crop year under review 34,790,945 bushels were wheat.

Vancouver has in recent years become an important grain-shipping port. Much of the grain from Alberta is shipped to the British Isles and European ports via Vancouver and the Panama Canal.

The Liberty Bell was first cast in London, England, in 1752.

Guest at wedding: "The bride's father put this wine in his cellar when the bride was born—and anybody can recognize that it is very old."—Karikaturen, Oslo.

FASHION

No. 107—Outstandingly Smart. This style is designed in sizes 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 3 1/2 yards of 39-inch material with 1/4 yard of 27-inch contrasting.

No. 138—Youthful Tunic Frock. This style is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust measure. Size 16 requires 2 1/2 yards of 39-inch material for blouse with 1 yard of 39-inch material for skirt and sash and 1 1/2 yards of 35-inch lining.

No. 564—Smart Jacket Suit. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 2 1/2 yards of 39-inch material for dress with 2 1/2 yards of 39-inch material for coat and 1 1/2 yards of binding.

No. 884—For School Days. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 2 yards of 39-inch material with 3/4 yard of 39-inch contrasting.

No. 179—For the Toddler. This style is designed in sizes 1, 2, 4 and 6 years. Size 4 requires 2 1/2 yards of

39-inch material with 1/2 yard of 32-inch contrasting.

Spring, the season of prettiest styles, will soon be here. Prepare now by ordering a copy of our new Fashion Magazine. Attractive styles for women, misses and children. And instructive lessons in sewing.

Price of book 15 cents. Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

4 Years without HEADACHE

How do you deal with headaches? Do you just take something to deaden the pain without getting rid of the trouble which causes the pain? Thousands do, despite the medical profession's warning cry of "DON'T!" Such makeshift methods simply suppress the symptoms of headaches. They merely numb the nerves and leave the underlying cause to look after itself. And it only obtains a flimsy grip. Headaches can generally be traced to a disordered stomach and to the unexpended retention in the system of stagnating waste material which poisons the blood. Remove these poisons prevent them forming again—and you'll never have to worry any more. And that is just how Kruschen Salts bring swift and lasting relief from headaches. Kruschen Salts aid Nature to cleanse your body completely of all clogging waste matter.

"For many years I suffered from severe headaches almost daily. I started taking the small dose (of Kruschen) a matter of four years ago, and I can honestly say I have never had a headache since." (Mrs. M. W.)

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claim for yourself. Ask your druggist for the new "GIANT" 75c package. This consists of our regular 75c bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your 75c immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffith Hughes, Ltd., Manchester, Eng. (Estab. 1756). Importers: McGillivray Bros., Ltd., Toronto.

WORLD HAPPENINGS BRIEFLY TOLD

The Earl of Bessborough, newly appointed governor-general of Canada, will sail for Canada on the Canadian Pacific steamship, "Duchess of Bedford," on March 27.

Lieutenant-General Bernheim, of Belgium, who commanded the Belgian troops on French soil during the great war, died recently in Paris.

Lord Bledisloe, governor-general of New Zealand, requested that his official salary be reduced ten per cent. for the public interest. Premier Forbes gratefully accepted his offer.

The sum of \$100,000,000 has been added to Great Britain's dole fund by the House of Commons, which accepted recommendations of Rt. Hon. Margaret Bondfield, Minister of Labor, for new unemployment loans.

Emile St. Godard, The Pas, Man., won the best time prize in the three-day New England dog derby championship at Laconia, New Hampshire. His brother, Leo, won the handicap time prize.

Russian winter wheat acreage is estimated by the United States Department of Agriculture, to have increased 19 per cent. over a year ago, when the area was estimated at 25,172,000 acres.

Great Britain's tragic dirigible R-101 is to fly again, in spirit. The Zeppelin works at Friedrichshafen, has bought the metal remains of the ship and will melt them down to be fashioned into parts for the new German dirigible LZ-129.

SUNDAY SCHOOL LESSON

MARCH 1

JESUS SENDING FORTH MISSIONARIES

Golden Text: "The harvest indeed is plenteous, but the laborers are few; pray ye therefore the Lord of the harvest, that He send forth laborers into His harvest."—Luke 10:2.

Lesson: Luke 9:1 to 10:24.

Devotional Reading: Romans 10, 8b-15.

Explanations and Comments

The Seventy Sent On a Mission, 10:1-3.—As Jesus had sent out the twelve on a special mission tour (9:1-6), so He now sent out seventy others. The text reads, "Now the Lord appointed seventy others"; but the appointment was for a special service, not as in the case of the Twelve, for permanent work. Jesus sent these men out in companies of two, for mutual help and companionship, and bade them go into the cities which He Himself was planning to visit after their preliminary work.

The Counsels Given the Seventy, 10:4-11.—These men were to travel light; they were to take with them no purse, no wallet, no shoes. They were to have no money in their girdles, which answered the purpose of a purse, and no provisions in their wallet, which was their provision basket (the Greek word translated "wallet" may also mean "begging-bag"); Jesus did not want His messengers to beg their way from "outsiders", and no shoes in addition to the sandals which they wore. Their message was vital, they must hasten, hence they could not stop to salute any one on the way, for Oriental salutations consume much time.

On entering a house, they were to utter the familiar "salaam," or friendly greeting, of "Peace be to this house"—a prayer that the household might be blessed in every respect. "And if a son of peace [a beautiful phrase for one inclined to peace] be there," Jesus added, "your peace shall rest upon him."

"But what were they to do when their friendly salutation was met with scorn, and the hospitality that was due a stranger was denied them? Often men who are great and noble in situations where popular favor surrounds them, lose their self-mastery under the irritation of little rebuffs and slight personal opposition. Jesus understood this, and so He told the men who were to represent Him in the villages: If your good-will is repulsed, you, at least, shall not lose it, but it shall turn to you again, and you shall keep calm, and sweet, and dignified under the irritation and the defeat."—Ozora S. Davis.

"What a beautiful idea, that the unheeded Peace comes back and blesses the heart that wished it, as if courteous and kind words never went unrewarded."—T. R. Glover.

The Mission Of the Seventy Crowned With Success, 10:17-20.—The Seventy returned with joy, and reported that even the demons had been subject to them in the name of Jesus. By a figure of speech (verses 18 and 19), Jesus declared that in their success He saw a prophesy of the ultimate conquest of His Kingdom over the whole world, but He gently rebuked their self-satisfaction by adding, "In this rejoice, not that the spirits are subject unto you; but rejoice that your names are written in heaven." "Do not rejoice in your command of a gift, but rejoice in your relation to your God."—J. H. Jowett.

The Joy Of Jesus, 10:21-24.—Jesus Himself rejoiced in the success of His followers and gave thanks to the Father that He had hidden these things from the wise and understanding (the scribes and Pharisees who thought themselves such), and revealed them to babes, the simple, unlearned Seventy.

Police In Canada Efficient

Law Enforcement In Canada Is Worthy Of Pride

It would appear from a survey of a report recently issued by the Canadian Government Bureau of Statistics for the calendar year 1929, that the police and law enforcement officials in Canada are on to their jobs.

Statistics collected from cities and towns having a population of 4,000 and over show that in 138 such centres with a total population of 3,359,703 the number of police officers employed was 5,004; one officer to every 671 persons. Summonses issued for infractions of the laws during the year numbered 168,932; and 127,627 arrests were made, an average of 25 arrests per officer. Offences reported to the police numbered 329,496; there were 263,532 prosecutions, 213,324 or about 81 per cent. of which resulted in convictions. Of the 11,160 automobiles reported stolen, all but 10 or over 99.9 per cent. were recovered. The value of other goods stolen was \$2,290,972, and the value of goods recovered was \$1,525,089.

Canada's Electric Railways
Electric railways in Canada carried 836,729,851 passengers in 1929.

Praises Irish Linen

His Majesty King George V. Makes Purchases In Belfast

"I prefer Irish linen and every shirt I have comes from Belfast," said His Majesty, when, with Queen Mary, he visited an exhibition of the Linen Industry Research Association in London, England.

Examining table linen that had been washed in various laundries, the king remarked: "Some laundries do use up linen, but I suppose when it comes back with holes it is good for trade."

His Majesty has just placed several acres of the royal estate at Sandringham, Norfolk, under cultivation for flax, though most English land-owners say that flax takes more out of the earth than it yields.

Persian Balm — There is nothing like it for creating and preserving a lovely complexion. Cooling, caressing—it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Persian Balm. A velvety smooth lotion, it makes the skin rose-leaf in texture. Recommended also to soften and whiten the hands. Truly a peerless toilet requisite for every woman.

American Films In Britain

Eighty-Five Per Cent. Of Motion Picture Films Shown In England Are Of American Origin

Eighty-five per cent. of the motion picture films shown in England are of American origin, and only 7½ per cent. British, Colonel John A. Cooper, president of the Motion Picture Distributors of Canada, testified before the investigation into affairs of the motion picture industry in Canada at Toronto. Investigation is centered around affairs of the Famous Players Canadian Corporation and its subsidiary companies.

Only about 30 Canadian pictures had been made since 1918, Col. Cooper stated.

Canadian Yellow Birch

Yellow birch is commercially the most important hardwood in Canada, forming more than one-third of the hardwood lumber produced in the Dominion.

Leprosy Being Cured

Eleven Patients Recently Released From U.S. Institution

Quietly, as ships long docked slip out into a strange sea, nine men and two women have left the government leprosarium at Carville, Louisiana, to face a world which some of them have not seen for two decades.

Each carried a treasure which money could not buy—a certificate attesting they have been cured of leprosy, a disease dreaded and shunned since Biblical times.

Some will take new names and make new lives—the government will ask no questions. Their departure—brightening the hope of 330 other patients—will bring the total number to be released in the last few years to 83.

Increase In Oil Production

Alberta Oil Production Is Decidedly On the Up Grade

Oil production in the Province of Alberta is decidedly on the up grade, according to the figures for 1930 recently compiled by the Provincial Government. The total output in 1930 was 1,433,844 barrels, compared with 999,152 in 1929.

The production for the month of December, 1930, was the largest for a single month that has yet been made in Alberta, 175,572 barrels, a gain of 81,318 over the corresponding month of the previous year. Most of the oil produced in Canada comes from Alberta. The Province of Ontario accounts for 125,000 barrels of the total production.

When Food SOURS

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless liquid; pleasant, efficient and harmless. But it kills excess acids. It has

remained the standard with physicians for more than 50 years.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get genuine Phillips' Milk of Magnesia prescribed by physicians for over fifty years in correcting excess acids. 50c bottles—any drugstore—The genuine is always a liquid—it is never made in tablet form. So look for the name Phillips' on wrapper and bottle.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

PRAIRIE ISSUES TO LOOM LARGE IN PARLIAMENT

Ottawa, Ont.—Questions affecting the grain-growing districts of western Canada will loom large in the coming session of parliament which opens March 12. Western members are beginning to arrive in Ottawa. They prophesy a very spirited debate and that prairie members will take a conspicuous part in it. They see no probability of the debate on the address in reply to the Speech from the Throne being wound up in a day, as has been the practice in recent sessions.

Behind the arguments for emergency relief, such as criticism of the credit policies of the banks in relation to the needs of western Canada, special freight rates, in view of the low price of wheat, and suggestions for bonuses on wheat, is the fundamental question of how to carry on in the future, in the opinion of the westerners. Can Canada successfully raise wheat in competition with the Russian five-year plan of big publicly managed farms?

"I see no reason why Russia will not be able to carry out its five-year project," said Hon. W. R. Motherwell, former minister of agriculture, one of the early arrivals. "The Russian people are deeply in earnest about this and are willing to wear their knuckles bare to see it through. I can see no silver lining to the cloud. Whether the efficiency they are showing in their five-year wheat growing plan can be kept up indefinitely is doubtful. I have had some pretty direct information from Russia, however, and I am convinced they will put through the five-year plan."

"We have come out of every other depression and no doubt we will come out of this one," Mr. Motherwell added, but he could not see just how. "Of course it is up to the government," he declared. "The people of Canada called in a new doctor last July."

Many westerners have expressed the opinion, that if Canada is successfully to compete with Russia in wheat growing, it will have to be by big farms, privately owned. H. E. Spencer, United Farmers of Alberta member for Battle River, who was in Ottawa this week, expressed the view that the day of the small farmer in the West would soon be over. He forecast an active session, with the U.F.A. group leading a vigorous attack on the government. He emphasized that large sections of the west were not suitable for livestock.

Mr. Motherwell, on the other hand, thought the small farmer would stand a good show in the future. "Large farms have not been a great success as a rule in the West," he said. "The alternative plan of a number of farmers co-operating in the ownership of combines and their expensive farm machinery has never been a success. Friction always develops. In fact you cannot standardize the size of farms any more than you can standardize the capacity of men to manage them. Some men have only the capacity to manage small farms and some make a success of 50,000-bushel farms."

"The West will have to go on raising wheat and take its chances," Mr. Motherwell continued. "You cannot close up a farm like a theatre. Some way will have to be found. This should be an interesting session of parliament."

Questions Traffic Law

Montreal, Quebec.—When a prominent lawyer drives past a "stop" sign and is hailed into court, he may make unexpected moves. J. A. E. Dion, K.C., summoned, challenged the city's right to enforce the by-law, saying it was authorized neither by city charter nor provincial motor vehicle act. He applied for a writ of certiorari and in Superior Court will seek to prove the by-law null, illegal and ultra-vires.

W. N. U. 1878

Federal Radio Rights

Rights Of Dominion and Provinces To Be Referred To Supreme Court

Ottawa, Ont.—The respective rights of the Dominion and the provinces on radio broadcasting will be the subject of a reference to the Supreme Court of Canada, it was officially stated recently. Preparation of the questions to be contained in the reference is under way.

No decision has been made by the Dominion Government as to whether or not it will be represented at the hearings being initiated in the Quebec courts by the Taschereau government on radio broadcasting. It is quite possible that the Dominion will not be represented at the proceedings started by the Quebec government, but will proceed to bring its own reference before the courts.

From all indications the matter of introducing legislation at the coming session of parliament will be dependent on the date on which the proposed Dominion reference is argued before the courts and a decision has been rendered. The probability, however, at the moment is that the judgment of the court may not be secured in time to bring down legislation next session.

The whole subject of radio broadcasting, involving the question of nationalization, has been under government consideration. Premier Taschereau of Quebec, though, raised the question of Dominion control within that province; and early this month the Quebec premier announced that his government was submitting a series of questions to the superior court of Quebec. The controversy over Dominion and provincial control has recently been the subject of public utterances by Mr. Taschereau and members of the Dominion government.

Grain Growing Countries May Hold Conference

Might Be Advantageous Says Retiring Chairman Of U.S. Farm Loans Board

Ottawa, Ontario.—Representations have been made to the Dominion Government, it was stated here, that a conference be held in which Russia, Australia, Argentina and Canada would participate to discuss the wheat situation. It is understood that so far the government does not take kindly to such a conference.

Despatches from Washington quote Alexander Legge, retiring chairman of the United States Farm Loan Board, as stating a conference of wheat producing countries might be advantageous. It might disclose on Russia's part a readiness to agree to more orderly marketing that would give better prices to all producing countries.

The Sunshine City

Calgary, Alberta.—Calgary claims the undisputed title of the sunshine city of Canada, as a result of the monthly report of the Dominion meteorological service for January. During that month this city enjoyed 188 hours of sunshine. The nearest figure to this was St. John with a total of 131 hours. Fredericton was third with 129 hours, while a few cities, particularly in the prairie provinces and Quebec, averaged between 110 and 115 hours.

Higher Duty On Beans

Ottawa, Ont.—Exercising power delegated to him at the last session of Parliament, Hon. E. B. Ryckman, Minister of National Revenue, has set a value of three and a half cents a pound for duty purposes on dried beans. This would not apply to imports under the British preference, the departmental order specifying that it had to do only with the intermediate and general tariff.

No Secession Movement

Toronto, Ont.—"There is no secession movement in Western Canada," said F. W. Turnbull, M.P., Regina, in the course of an interview here. What you hear about is merely the agitation of a very small few, noisy individuals anxious to attract attention to themselves and succeeded in attracting that attention everywhere but where they are. The West pays no real attention to them."

FOR REVISION OF WAR DEBTS

Sir Thomas White, former finance minister of Canada, who proposes a convention of all interested nations and a renunciation or revision of all war debts.

Duty Is Remitted

Old Clothes From England For Saskatchewan Farmers Escape Duty Payment

Ottawa, Ont.—Northern Saskatchewan farmers have applied to relatives in the Old Country for old clothes. The appeal having been heard the customs officials in Canada, however, have been holding up the shipments for payment of duty of 25 per cent. In some cases the officials made the duty higher than the value of the clothing in London.

A farmer at Clondonald, north of Lloydminster, has appealed to Ottawa, claiming the farmers were penniless and too poor just now to pay even the duty on secondhand clothing. It has been ascertained that there is a clause in the Customs Act providing for the remission of duties on secondhand clothing when an affidavit is made that the recipients were not in a position to pay. Customs officials at Lloydminster, where the clothing has been held up, have been notified of the regulation and ordered to deliver the clothing on receipt of the affidavits.

Asking Amendments To Criminal Code

Several Changes Requested By Chief Constables' Association

Winnipeg, Manitoba.—Numerous changes, additions and amendments to the Criminal Code of Canada were asked when the legislative committee of the Chief Constables' Association met the minister of justice and other law enforcement officials at Ottawa.

Chief of Police Chris. H. Newton, of Winnipeg, who is secretary of the association, attended.

The legislative committee urged the use of telegraphic warrants, amendments to the Vagrancy Act, and discussed deportation of undesirable and problems of handling unlawful gatherings.

New Ministry For Spain

New Regime Expected To Restore Legal and Political Stability

Madrid, Spain.—Spain now has a new government, peacefully formed, and is looking forward to at least a period of calm after the political turmoil of the last few days.

Admiral Juan Bautista Aznar, staunch Royalist and political neutral, heads the ministry formed by King Alfonso in a successful effort to head off another military dictatorship like that of Miguel Primo de Rivera.

The King called for no participation on the part of Left, Socialist and Republican elements, and their attitude remained problematic. The public generally, however, seemed to be waiting quietly until the program and policies of the new government could be formulated and put into effect.

The cabinet that replaces that of Damaso Berenguer, which resigned because of widespread opposition to Premier Berenguer's plans for parliamentary elections in March, includes Berenguer himself, and the Count of Romanones and the Marquis of Albuemas, the men most responsible for his overthrow.

It is formed of Right Monarchists with Liberal, Conservative and Catalan Independents' party representation and according to its chief the heart of its program will be the restoration of legal and political stability.

To Open Parliament

Justice Duff Will Officiate At Ceremony On March Twelfth

Ottawa, Ont.—Parliament will be opened on March 12 by Mr. Justice Duff, of the Supreme Court of Canada. The ceremony will be performed, it is officially stated, by Mr. Justice Duff in his capacity as administrator.

Canada's new governor-general, the Earl of Bessborough, will not arrive in Canada until April 3 or 4. Chief Justice Anglin, who is now in the West Indies, will not return to this country until April 23. The chief justice will join the official party to the Buenos Aires exhibition when they reach Trinidad on March 2 to proceed to Buenos Aires.

Aid For Unemployed

More Than \$15,000,000 Has Been Spent In Ontario

Toronto, Ont.—More than \$15,000,000 has been spent in the province of Ontario in providing employment and relief since the Dominion Unemployment Relief Act came into force, and 43,000 men were given employment up to the end of January, Premier George S. Henry told the legislature in moving second reading of his Unemployment Relief bill.

At a brief sitting the House approved the bill, which authorizes the expenditure of \$4,000,000 by the province on unemployment relief and validates certain debentures floated by municipalities to finance their share of the relief programme.

SETS NEW WORLD'S RECORD

Capt. Malcolm Campbell, British speed driver, who set up a new world's speed record on land of 245 miles an hour.

RELIEF PAYMENTS TO PENSIONERS WILL CONTINUE

Ottawa, Ont.—Relief payments to pensioners will be continued by the Dominion Government at the same rate as heretofore. Official announcement to this effect by Premier R. B. Bennett will be received with widespread approval by pensioners affected throughout the Dominion.

"Payments already made for relief purposes to pensioners had exhausted the appropriation by parliament," the prime minister declared, "and, in addition, a substantial sum secured through governor-general's warrants. The law provides that governor-general's warrants can only be issued in cases of urgent necessity."

"The minister of pensions and national health has been investigating the situation and, being now satisfied of the great urgency of the case, an additional warrant has been issued by the administration and relief payments to pensioners will be continued at the same rate as heretofore. There was no desire, much less intention to cause hardship to those who had been receiving relief."

Schedule of monthly allowances for unemployed pensioners, which Premier Bennett announced will be continued, is as follows: Single men, \$30; married men with no children, \$45; married men with one child, \$57; married men with two or more children \$67.

Maximum of pension obtainable for unemployed pensioners has been \$67 monthly. From this amount is deducted the pension the man was receiving and the difference is paid in the form of a voucher to be used in the purchase of the necessities of life.

Questions Cost Money

Many Queries Regarding Russia Come Up In British Parliament

London, England.—"Out of 1,680 questions addressed to me since I took office, 562 or approximately one-third, have related to Soviet Russia," said Rt. Hon. Arthur Henderson, secretary for foreign affairs, in reply to a question from Miss Ellen Wilkinson, Labor, East Middlesbrough, in parliament.

The foreign secretary said he was unable to give any estimate of the cost of ascertaining the information that had been given, but the cost of issuing three official statements on Soviet legislation, religion, and labor was about \$700.

Miss Wilkinson quoted the estimate of a member of the previous Conservative government, that average cost of ascertaining a reply to an official question was \$10, and suggested the opposition might make a move in the direction of national economy in this respect.

School Act Amendment

Use Of French Language For First Year In Saskatchewan Public Schools To Be Abolished

Moose Jaw, Sask.—A School Act amendment which will abolish the use of the French language in public schools will be brought down before the present session of the legislature, Premier Anderson announced before the Saskatchewan School Trustees' convention.

It had been the practice, he said, as minister of education, to allow a French child in the province of Saskatchewan to receive instruction in the schools during the first year in French, and this meant that at the end of 10 months a child might know no English. This innovation is planned, he said, not because he did not respect the French or their culture, but because the system as at present was not pedagogically sound.

Train Wreck In China

Hankow, China.—Thirty were killed and 72 injured in a train wreck, near Sinyang, 100 miles north of here on the Peiping-Hankow Railway. Because of heavy snowfall, which crippled wire and rail communications, the report reached here February 18.

EDOUARD J. ROULEAU,
Editor and Publisher

REDUCTION OF THE MOTOR VEHICLE LICENSE

No doubt the question of the reduc-
tion of the automobile license fee will
be fully discussed at this session of
the legislature, as the budget contained
some mention of the subject. This
question ought to receive the attention
of the entire legislature, both govern-
ment and opposition, for the question
is of vital importance to almost one
hundred thousand motorists of Alberta.
The main theme of reduction seems
to be, as advocated by the Alberta
Automobile Association, to have a gen-
eral reduction in the license fees for
motor vehicles, and have the difference
of revenue made up by an increase in
the gasoline tax. In this way the re-
venue for the maintenance of roads
and highways would be approximately
the same, but the automobile owner
using these roads would pay for their
up-keep.

This is as it should be. That is, if
the owner of an automobile, such as
farmers, etc., has no real need for an
automobile, and does not use it a great
deal, he will only pay that part of the
upkeep of roads for which he has
caused to be destroyed by his usage.
On the other hand, travellers and
others, who are constantly on the road
and who are making a revenue there-
by, are doing more damage by wear
and tear on the roads and they are the
ones that ought to pay for road main-

tainance.

The advocated plan of the Alberta
Automobile Association of reduction
of the license fees on motor vehicles
and the maintaining of the present
revenue by an addition to the gasoline
tax, is one worthy of every considera-
tion by the government and we believe
that this plan will work out much
more satisfactorily than the old li-
cense fees and gasoline tax.

THEY'LL GET YOUR MONEY IF YOU DON'T WATCH OUT

Grafts designed to get the people's
money spring up daily, and many of
them are operated with great success.
One of the great problems is that
too many people take too little trouble
to find out what they are getting for
their money.

People, as a rule, are not inclined
to complain much when they can see
what they are getting for their money
but they do get critical when they
know that undue advantage is being
taken of them.

Through carelessness and lack of
nerve to stick up for what is right,
many people stand for being grafted
and refuse to help putting a stop to it.

To get the best value for your
money you should first know your re-
quirements, after which you should
study the advertisements of your local
business concerns carefully so you
will best know where to fill your needs.

Always bear in mind the proven
fact that only the best quality can
stand the light of continuous adver-
tising.

The progressive business concerns of
your home town have a constant ca-
pacity to understand your needs and
they always endeavor to be just, hon-
est, fair and courteous to you.

"JANE" GOES TO SPORTSMEN'S SHOW

"Jane" the cow moose who will re-
present the Province of New Brun-
swick at the Boston and Philadelphia
Sportsmen's Shows, left Salisbury, N.
B. recently via the Canadian National
Railways, for Boston and Philadel-
phia along with a young bull and two
deer. The animals travelled in crates
made of 2x4 material in an express car
and an attendant accompanied them in
the car. "Jane" and her fellow travel-
lers had their own special menu con-
sisting of boughs and bran, an ample
supply of boughs being cut and loaded
into the car for that purpose. The
animals did not seem to mind the jour-
ney, munching contentedly on the
boughs, which were shoved through
the bars of the crates.

Royal York Wins Architects' Medal

The Royal York Hotel, Toronto, the largest hotel
in the British Empire, is again in the limelight,
having won for its architects the 1930 Gold Medal,
awarded by the Royal Architectural Institute of
Canada, for the outstanding achievement in the past
three years. Sixteen architects from various parts of
Canada submitted photographs of buildings within
the terms of the competition, to the 52nd Annual
Exhibition of the Royal Canadian Academy,
recently held in Toronto, the prize going to the

Canadian Pacific Railway's great new hostelry.
Formal presentations will be made to the successful
competitors: Messrs: George A. Ross, F.R.I.B.A.,
and Robert H. MacDonald, F.R.I.B.A., of Montreal
(upper left and right); and Messrs: Henry Sproatt,
F.R.I.B.A., LL.D., R.C.A., and Ernest R. Rolph,
F.R.I.B.A., A.R.C.A., of Toronto, (lower left and
right), at the next annual meeting of the Institute,
to be held at Lucerne-in-Quebec, February 20th and
21st, 1931.

Good Hunting in Laurentians

This fine bull moose with 56 1/2-inch spread of
antlers was shot in Mount Tremblant Park,
Laurentians, about 60 miles east of Mont Laurier,
at the end of Canadian Pacific steel, by R. H. Vickers
and A. C. Iler, Montreal hunters, recently. It came
to the call of Gaston Prevost, well-known northern
guide who is also fire ranger of the district. When
shot, the animal fell into the Cypress River, its

1400-pounds of weight sinking it into the mud. The
hunters were forced to improvise a raft of cut logs on
which they towed the body to camp. Photographs
show close-up of the moose and of the body being
towed to camp, the heavily loaded canoe and a snap
shot of a passage through shallows. The guide stated
that in all his experience he had never seen moose so
plentiful in the district.

CHAPTER XI.—Continued.

Halliday's clenched hands trembled. He was remembering a time when he could not have gazed upon her thus without a longing to lay his cheek against her own. No such desire stirred him now. Her beauty seemed, almost, a repellent thing. His face quivered as he looked at her; but at last, with a sigh of weariness, he turned away and went to his own room.

For a week Nick's life hung in the balance. The fearful chill of the cold ride—the strain on his nerves—the terrible fatigue, had done their worst; and had it not been for the clean young strength of him, pneumonia would have claimed him for a victim.

"He's got only a fighting chance, Gay," said the old doctor honestly, while the look in his eyes nearly broke her heart, "but Nick won't go under without a fight. Now's the time, my dear, when he'll be repaid a thousandfold for leaving his wild oats unsown. He's sound and strong, and he has a lot to live for. We'll pull him through if it's a human possibility."

Gay hardly saw her babies in those days. With Julie's help she dressed them every morning, and after breakfast Janey Garnett (John Maxwell's youngest daughter and Gay's girlhood chum) home on a visit with her own baby, took them in charge, keeping them happy through the long days, and returning them at night, ready for bed.

"I'd keep them nights and all, Gay, if I didn't know you'd be happier to have them here," said Janey understandingly. "Mother says not to worry about dinner for tomorrow. She'll send down enough for everyone. Oh, Gay, I wish we could do more!"

Gay couldn't speak. This was the third day, when things looked very black indeed. A second nurse was installed now, and Uncle Sim was staying at the Bakersville Hotel, spending his time between Gay's garden, where he paced back and forth like a caged beast, and John Maxwell's house, where he took a sad pleasure in helping to keep the babies happy.

An atmosphere of gloom pervaded the First National Bank.

"Gosh!" exclaimed Johnny Symmes, whose cage joined Nick's, "what if he don't get well? I saw Doc Bennett this morning, and he said—"

He broke off suddenly, and began an attempt at whistling that deceived no one; while two stenographers openly wiped their eyes. The First

National Bank was about as cheerful as a mausoleum.

Gloom also pervaded the house of Halliday. After five days Angela said she could stand it no longer.

"I believe I'll go to the shore. Between hearing you at the telephone calling up the hospital about that child—and the sight of that horrible old man pacing up and down that garden, I'll go crazy. I think I'll go to Narragansett for a month."

"You will do no such thing," James Halliday spoke quietly, but with decision.

"You may be heartless, Angela, but for the sake of decency you shall not behave so, when, because of your own actions, the man is at death's door."

She drew an angry breath. "You blame me for everything. It wasn't my fault that that stupid child ran in front of the automobile."

"No; but you shouldn't have been there, Angela. Considering the errand I had gone on, would it have hurt you to stay quietly at home?"

"What good would it have done me to be bored all day? No one in Bakersville knew your mother."

He turned away, then said, his back still to her: "Who were the friends whom you expected to join you on your trip?"

"Friends?" Her voice was a little breathless, and her eyes dropped as he wheeled and faced her.

"What do you mean?"

"I mean that Hastings understood you expected company to take this trip; and that you didn't wish to drive the new car yourself."

She shrugged. "Where did you get all that?"

"That's neither here nor there, but—"

"You got it from that stupid little woman," she said scornfully. "Probably he concocted the story so she'd let him go. I didn't suppose he was so clever."

"Hastings is not a liar," said her husband quietly.

"And am I?" Her eyes narrowed; but Halliday merely turned and left the room.

Slowly, doggedly, Nick fought his way through "the valley of the shadow."

"He'll pull through now," said the doctor quietly, "provided he has no set-backs, and we'll see that he doesn't. He's sleeping quietly and naturally. When he wakes, Gay, you can sit with him a while; but you mustn't talk. There, child! cry if you want to. It's been a hard week—hard on all of us. Gay, I'm going to stop at the bank on my way home, and let 'em know the worst is over."

But the doctor's progress down Main Street was very slow. People hailed him from many a doorstep, and went more happily about their tasks at the good news.

"Everyone loves Nick," he mused as he started his car for the fifth time in a half mile. "He's a good boy; but I can't help wondering why he was off that day with Mrs. Halliday. Don't understand it. Hope people won't get wind of it. Halliday won't talk, but somehow I don't trust his wife. She's a mischief-maker or I don't know women. Her eyes are too innocent for truth. But she's mighty pretty! Don't know when I've seen such a pretty face; though I wouldn't mind if she'd take it away from Bakersville for good and all."

She did take it away, for a time. Two days later, when James Halliday returned from a trip to a distant

PILES
PAIN STOPS LIKE A FLASH!
"I had piles for months. Nothing helped me until I tried 'Sootha-Salva'. The first application ended itch and pain. Piles gone."
— E. C. Arley. End pain quick. All druggists.

hospital, he found a violet-scented note in his wife's place:

"Now that our neighbor is out of danger, I suppose I may get the change I need. You gave me little enough sympathy after that terrible experience; but then, I didn't expect sympathy from you. I'm going to Rye. Don't look for me for a fortnight, or longer, but send a check first mail."

"It's just as well," said Halliday to himself, as he dropped the missive in the waste basket. "It may be a relief to Mrs. Hastings to know she's gone."

But in truth, Gay had no thoughts, unkind or otherwise, of Angela Halliday. In those days of anxiety and dread she had forgotten her. Now, in the joy of seeing Nick come back to life, nothing else mattered.

"There's a lot to explain," he said on the first day he was allowed a word or two, "but I haven't the strength for it now. If you'll just keep on trusting me—"

"I'll trust you forever and ever," she interrupted, and he said:

"I know, dear. I've known it all the time; but there's something I've got to ask or I can't rest. A terrible thing happened on that trip, Gay. I must find out—"

"It's all right, Nick," she broke in quietly. "The child is living. Mr. Halliday told me. He's been to see the little thing. Oh, my dear, everyone has been so wonderful! Now that you're getting better I—I feel that these terrible days have been paid for, almost, in human kindness."

He smiled, and would have spoken, but she said: "Wait, Nick. I haven't finished. I've been finding out that what your mother told you is true as truth. When the way seems hardest we do seem to reach a hill-top, a place where we can breathe again, and see life and—everything, with a new vision. I can't say just what I mean, perhaps, but I feel that I've reached one of those hill-tops now. Life will lead us into the valley again. I know; there'll be suffering, and trouble, and doubts, and anxieties to live through; but I shall always be richer for the dearthness of those who tried to make this hard time easier. Don't you believe that, Nick?"

"Oh, Gay," he answered, "if I could only keep you on the hill-tops! But—but as I look back at things, I see that all your troubles come through me!"

She retorted, the first care-free smile in days lighting her eyes: "Have you thought where I find my joys?" (To Be Continued.)

Carbon Monoxide May Have Killed Explorer

Stefansson Believes Andree Over-
come By Fumes From Stove

Vilhjalmar Stefansson, writing in the "Spectator," lifts a corner of the curtain which enshrouds the death of Salomon August Andree, who never came back from his polar balloon expedition of 1897.

Andree and K. Fraenkel, whose bodies were found in the Arctic wastes last August, were overcome by the subtle fumes of carbon monoxide as they sat about a kerosene stove in their virtually air-tight tent, Stefansson believes.

He developed his theory from evidence discovered on White Island, where the bodies of the explorers and the remains of N. Strindberg, another member of the expedition, were found. He almost died himself of the cause, Stefansson writes, in an Eskimo snowhouse on Coronation Gulf 20 years ago.

Where the Plums Are

"After all, the city government is just like a tree—we officials are merely the branches, but you people are the roots and the trunk."

"Aye, true," spoke up one son of Erin, "but ye must admit that all the plums grow on the branches."

"I know where you can get a chicken dinner for 15 cents."

"Where?"

"At the feed store."

W. N. U. 1878

Libraries In Canada

Hundreds Of Libraries Give Readers
Free Access To Good Literature

Supplementing the work of the various educational institutions of Canada are hundreds of libraries in different parts of the country. In a list of 1,025 for which statistics have been collected, 623 are free public and association libraries, 126 are university, college or normal school, 52 are Dominion or Provincial Government libraries, and 224 are otherwise classified. Legislation making some provision for public library accommodation exists in each of the provinces, as well as in the Yukon; and all of the larger centres of population have libraries free to all. Smaller settlements, especially those in frontier places, such as mining and lumber camps, are reached by travelling libraries under the management of the Provincial Governments, or universities. In each of the provinces legislation is in existence to facilitate the establishment or expansion of libraries in the public schools, and many of these institutions have very considerable collections.

Diver Likes Synthetic Air

Increases Efficiency Says Well
Known Submarine Engineer

"Synthetic air," composed of helium and oxygen, as a means of sustaining the respiration of deep sea divers, has received the O.K. of Captain Sloan Danenhower, widely known submarine and salvage engineer.

Captain Danenhower, who will command the Wilkins submarine "Nautilus" on its undersea dash to the North Pole this summer, made a diving test at the Philadelphia navy yard in which "synthetic air" was used instead of Mother Nature's atmosphere.

"The advantage of using helium-oxygen," he explained, "will increase the efficiency of divers as to the depth they can go, the time they can work under the surface and the speed with which they can go through the decompression process."

After 10 Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

A Real Celebration

Here's a short story on longevity. Mrs. C. H. Jones, 80, of Cornwall, Vermont; Mrs. Lucy Crane, 90, and Mrs. John J. James, 78, both of Weybridge, went to Lewiston, N.Y., to help their fourth sister, Mrs. Elizabeth Jewett Scovell, celebrate her 100th birthday. All four sisters are in excellent health.

CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

Fletcher's
CASTORIA

Little Helps For This Week

"He healeth the broken in heart, and bindeth up their wounds." — Psalm cxlviii. 3.

Then sorrow, touched by Thee, grows bright

With more than rapture's ray.
As darkness shows us worlds of light
We never see by day.

—Thomas Moore.

Wherein is the blessedness of those that mourn? Christ says, in being comforted, in the victory of their faith, in the endurance of love, trust and patience. Remember until we are thus comforted in our hours of sorrow, we are not one with our Leader, nor in communion with our Father's Spirit. No one will suppose that the blessing of affliction consists in the suffering it brings. It consists in the spiritual response to suffering of one whose confidence is in the source of love.—John Hamilton Thorn.

Soft corns and warts are ugly, painful and irritating. Remove them quickly and surely with Douglas' Egyptian Liniment.

A naturalist points out that there are more than 500,000 kinds of insects, and most of them make no sound that a human being can hear.

HEAD HURT?

WORK won't wait for a headache to wear off. Don't look for sympathy at such times, but get some Aspirin. It never fails.

Don't be a chronic sufferer from headaches, or any other pain. See a doctor and get at the cause. Meantime, don't play martyr. There's always quick comfort in Aspirin. It never does any harm. Isn't it foolish to suffer any needless pain? It may be only a simple headache, or it may be neuralgia or neuritis. Rheumatism. Lumbago. Aspirin is still the sensible thing to take. There is hardly any ache or pain these tablets can't relieve; they are a great comfort to women who suffer periodically; they are

always to be relied on for breaking up colds.

Buy the box that says Aspirin and has Genuine printed in red. Genuine Aspirin tablets do not depress the heart. All druggists.

musical entertainers, will render one
of their popular programmes, under

Here and There

Production of newsprint paper in
Canada in 1930 totalled about 2,-
500,000 tons, a production consider-
ably greater than that of any other
country.

Canada will have a large and at-
tractive exhibit at the Buenos Aires
Exhibition, March 14 to April 27.
Canadian manufacturers will also
be exhibiting their products in the
Canadian section.

Hotel accommodation in the Pra-
rie Provinces, according to the lat-
est computation, is arrived at as fol-
lows:—In Manitoba, 285 hotels; in
Saskatchewan, 400; and in Alberta,
119.

Portugal is the latest recruit to
be forthcoming World's Grain Ex-
hibition and Conference to be held
in Regina in the summer of 1932.
Eleven other countries have so far
notified their intention to show.

Oil production in Alberta is de-
cidedly on the upgrade, according
to provincial government figures
recently compiled. Total output
in 1930 was 1,433,844 barrels com-
pared with 999,152 in 1929.

Placement of 1,600,000 salmon fry
and 1,000,000 trout has been made
throughout different sections of
Nova Scotia, a generous percentage
of which went to the brooks and
streams of Annapolis Valley.

Life, fire, accident and other in-
surance companies collected a total
of \$10,366,636 in annual premiums
on policies in force in Nova Scotia
during the past fiscal year. This
represents an increase of nearly
\$1,000,000 over the previous year.

A combination of high speed at
sea, special rail facilities at Quebec
—including a tunnel under the fam-
ous battlefields—and special trains
to New York and Chicago will
shorten the time between London
and most Canadian and United
States cities by from one and a
half to two days.

Freight transportation require-
ments of the United States are
equivalent to hauling 400 billion
tons one mile every year and there
is no other instrumentality that can
handle more than 20 per cent. of
these requirements, it was stated
recently in an address in New York
City.

C. B. Andrews, of Winnipeg, has
been appointed district passenger
agent at Saint John, N.B., in suc-
cession to George S. Beer. Mr.
Andrews joined Canadian Pacific
service in 1910 and has worked his
way up from a clerkship in the
superintendent's office at Souris,
Manitoba.

Co-operative associations in Can-
ada numbered 1,095 in 1930 with a
total membership of 690,685. In
1929 there were 936 of these or-
ganizations which reported 512,835
members. They include grain
growers, dairy farmers and fruit
and vegetable growers in the east-
ern provinces.

Enrollment in the Saskatchewan
Government's correspondence
school has now passed the 5,000
mark, according to information re-
ceived from the office of Premier
J. T. M. Anderson, Minister of Ed-
ucation. Applications are still
coming in, as many as 43 being re-
ceived in one day, and up to the
present the department has been
able to handle all applications.

the auspices of the Ladies' Aid of the
United Church, Carbon, in the Farm-
ers' Exchange Hall on Friday night,
February 27th, at 8 p.m. Rev. Mr. Gil-
bert will deliver a short lecture on
"The Comradeship of Music" some-
time during the evening. Single tickets
25c; Family tickets \$1.00.

Representative William Williamson
of South Dakota, told a story at a
Custer banquet.

"In the Black Hills," he said, "there
is a gold mine with a peculiar name—
a name that has a beautiful story
attached to it.

"A prospector and his wife were

walking in the hills one day when the
woman tripped over a stone. The stone
dislodged by her foot, rolled down-
ward five or six yards. When it stop-
ped the prospector noticed a little
thread of yellow running through it.
Gold! A gold mine has been discover-
ed.

"When it came to the naming of the
new mine, the prospector's wife said:
"Will you name it after me, dear?"
"Yes, darling, I will," replied the
prospector. "Yes, I'll name it in your
honor."

"And from that day to this, gentle-
men, one of the richest gold mines in
the Black Hills of South Dakota is
known as The Holy Terror."
